

CAN2GO Building Automation System

CAN2GO training - March 2012 for Partners and System Integrators

Training overview

Provide partners and System Integrators with the knowledge and expertise required to plan, deploy, configure and support CAN2GO Building automation solutions - including:

- Overview of network design (IP/Ethernet, CANbus, Wireless);
- Overview of wireless technology (EnOcean and Zigbee), planning, site survey and deployment;
- Overview of the product capabilities and the web BMS (configuration);
- Overview of Lua scripting including how to program HVAC and lighting applications;
- Hands-on exercises (configuration of the devices, wireless planning, Lua scripting).

Pre-requisite

- Reading the CAN2GO Lua scripting guide
- Bring your laptop!
