

Non-invasive and cost-effective energy efficiency retrofits

Faster installation, integration and payback. **CAN2GO** ✓

CAN2GO building automation for retail buildings

Energy savings & comfort

CAN2GO is a simple and cost-effective solution that will reduce your energy costs by improving control over your HVAC and lighting systems based on building use, opening hours and weather conditions.

> More control = More savings

Multi-site control & fast payback

No need to pay for a server and/or software license for each of your locations. CAN2GO controllers include a license-free web BMS that allows remote management of the sites via secure connection.

> CAN2GO Web BMS = No license fees

Save...

- > On your energy bills
- > On installation
- > On maintenance

CAN2GO Web BMS
Remotely control, program & monitor sites without software license fees or dedicated server costs

In-and-out without making a mess

Wireless makes the installation process much cleaner. Your business doesn't have time for the patching and painting that comes with wiring everything. Use wiring only when necessary; use wireless for the rest. CAN2GO supports both.

> CAN2GO = Wired & wireless = No mess

Fast installation, less downtime

CAN2GO wireless control and networking capabilities reduce the need to wire end-devices and controllers. Less wiring means less labor, which means minimal installation downtime and inconvenience.

> Less wiring = Less labor = Less downtime

HVAC, lighting, refrigeration & more...

With CAN2GO, a single controller can manage HVAC, lighting, refrigeration, metering and other systems simultaneously, without any gateways. This reduces hardware costs and increases efficiency.

> All-in-one solution

Stay open

Limit business downtime. CAN2GO is the least invasive BAS solution on the market.

Small
branches & stores

Large
stores, malls, warehouses & offices

Mid-size
stores & malls

Easy fit

Easily relocate points according to store configuration changes.

Building automation's missing link™

More energy savings and less downtime for retail. **CAN2GO** ✓

CAN2GO for your retail locations

Control refrigeration, HVAC, lighting, metering and more

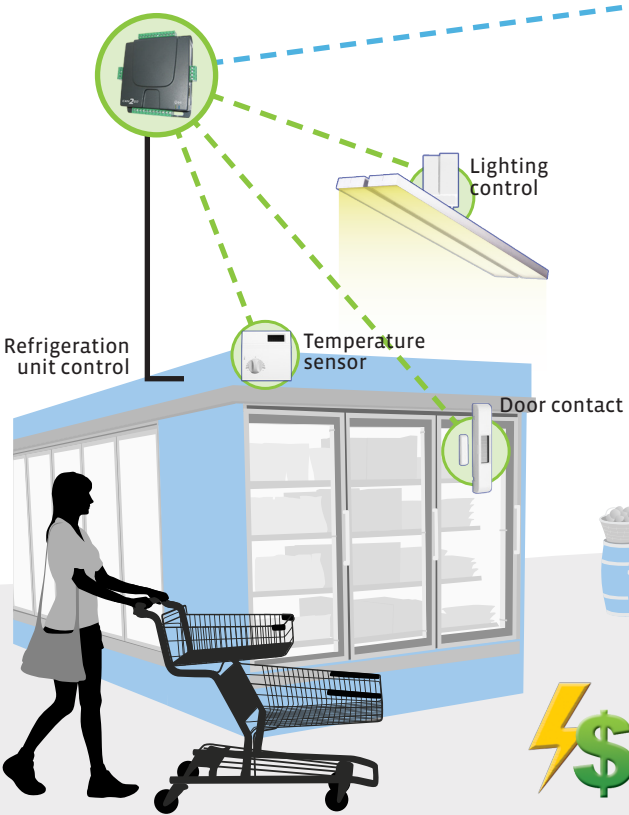

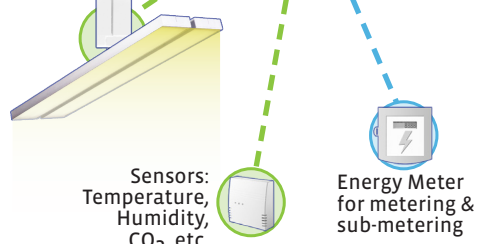

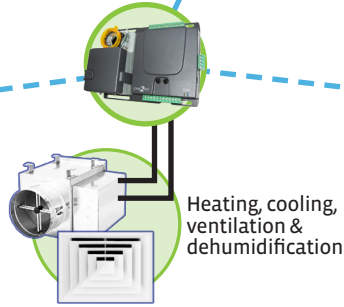

CAN2GO controllers monitor and control building systems with precision and according to building use. This increases efficiency and reduces consumption for refrigeration, HVAC and lighting.

CAN2GO units can also integrate exterior signage and lighting, as well as meters and sub-meters.

Remote access & analysis

The CAN2GO Web BMS allows remote management of the building via secure connection. The CAN2GO Web BMS can also make trend logs and energy data available for analysis and retro-commissioning.

Your efficiency, their comfort.

CAN2GO reduces your energy expenses and provides the comfort your customers deserve.
